Personal Project

<https://github.com/user340/basepkg>

The screenshot shows the GitHub repository page for `user340 / basepkg`. The repository is described as "NetBSD system packages". It has 520 commits, 4 branches, 23 releases, 1 environment, 2 contributors, and is licensed under BSD-2-Clause. The page includes navigation tabs for Code, Issues (3), Pull requests (0), Insights, and Settings. Below the repository name, there are tags for `netbsd`, `pkgsrc`, `pkgsrc-wip`, `syspkg`, and `shellscrip`, along with a "Manage topics" button. A progress bar shows the repository's activity. The "Branch: master" dropdown is set to "master", and there is a "New pull request" button. The "Clone or download" button is highlighted in green. The commit history table shows the following entries:

Commit	Description	Time
distrib/www.must-have-coffee.gen.nz/lloyd	Use distrib directory for third-party things	6 months ago
man/man1	Update man page	a day ago
sets	delete patch dir	4 months ago
LICENSE	Update copyright	2 months ago
README	Update copyright	2 months ago
basepkg.sh	Update valid_MACHINE_ARCH	3 days ago

About Working Area

Yuuki Enomoto

syspkgs

- Contact: [tech-install](#), [tech-misc](#)

syspkgs is the concept of using pkgsrc's pkg_* tools to maintain the base system. That is, allow users to register and components of the base system with more ease.

There has been a lot of work in this area already, but it has not yet been finalized. Which is a diplomatic way of saying that this project has been attempted repeatedly and failed every time.

Beginner

Other things (My Problem)

- How to commit my changes to source tree.
- How to send e-mail from @NetBSD.org (mutt on mail.NetBSD.org?) with my PGP sign.
- My machine said “uncorrectable data error reading fsbn ...”.

Thank you
