## NetBSD Foundation Membership Application Form

This form should be filled out by the applicant, with help from his or her sponsors.

After completing this form, please send it to the NetBSD Foundation Executive Committee for Membership, at the e-mail address <membership-exec@NetBSD.org> and CC: your sponsors.

When filling out this application, please provide information in all of the fields (except those in section 5). If in any free-form text field you need more lines than are provided by the form, add additional lines (with the correct prefix) as needed.

If English is not your native language, then please fill the form in to the best of your ability and pass it to someone else for proofing and correction of spelling and grammar, particularly sections 2 and 3.

### Section 1 - Contact info

This is the relevant contact information for the prospective developer.

1A: Full name: Yuuki Enomoto  
1B: E-mail address: uki@e-yuuki.org  
1C: Requested NetBSD.org login: uki

### Section 2 - Proposed work area(s)

This is a free form text field where your prospective work areas are listed. This field will be used as part of the posting to the netbsd-announce@NetBSD.org mailing list.

希望する作業領域

2A: I want to work in these area.  
2A: - usr/src/distrib/sets  
2A: - usr/src/distrib/syspkg  
2A: I might have to make little changes to some parts of build.sh  
2A: for work result.

### Section 3 - Accomplishments and Qualifications

This section contains free form text fields where you may list your recent accomplishments or contributions to the NetBSD project. Section 3A should include a summary of your qualifications.

3A: I had been studying about NetBSD's packaging, and I want to manage 3A: NetBSD's base system by using package. I had been developing 3A: basepkg (<https://github.com/user340/basepkg>) to achive such purpose 3A: but I found that updating upstream is better than forking from 3A: upstream; especially, under the usr/src/distrib/sets/lists. 3A: syspkg has not yet been finalized. So I want to contribute to 3A: syspkg using the result of basepkg's develop (it isn't means that 3A: I want to import basepkg to NetBSD).

A black and white photograph capturing a salmon in mid-leap over a small waterfall. The fish is positioned in the center-right of the frame, its body arched as it moves from the turbulent water below towards the upper left. The waterfall itself is characterized by white, frothy water cascading over dark, rocky ledges. The background is a dense forest of evergreen trees, their dark silhouettes contrasting with the lighter tones of the water and the fish. The overall scene conveys a sense of natural power and movement.
